About This Famous Cotton**

Delfos 9169

... The Ideal Cotton

This new improved strain of Stoneville's DELFOS 9169 ('53)*, especially adapted to alluvial soils, is setting outstanding records for lint production. In all tests at Delta Experiment Stations located in Arkansas, Louisiana and Mississippi, DELFOS 9169 in 1951 had the highest dollar per acre average of any cotton tested. A five-year average of cotton tested within the state of Mississippi showed DELFOS 9169 to have the highest money value per acre than *any* cotton tested.

DELFO 9169 SETS WORLD PRODUCTION RECORD

In winning first place in the 1951 Mississippi 5-Acre Contest, DELFOS 9169 produced a record-breaking yield—8,915 pounds of lint cotton from the five acres or *an average yield per acre of 1,783 pounds*.

Facts

About DELFOS 9169 ('53)

PLANT TYPE—Sturdy, stands well, medium leaf

BOLL—Big, slightly tapering, mostly 5-lock

MATURITY—Medium early for a big boll cotton

PICKING QUALITIES — Very good, opens well, does not string out, ideal for mechanical as well as hand picking

STAPLE LENGTH—1-1/16 to 1-5/32

LINT PERCENTAGE—35% to 38%

SEED MILLING VALUE—Extra high

('53)

for Bottom Lands

DELFOF 9169 BEST FOR MECHANIZATION

The 1951 mechanization test, conducted by the Delta Experiment Station of Stoneville, reflected the all-around superiority of DELFOF 9169 and its complete adaptability to modern mechanization methods. Not only did it produce more lint per acre, but it showed *better* storm resistance, *better* machine "pickerbility" and *less* "picker waste" than any other cotton in the test. These features naturally result in higher cash income per acre.

A sure way for you to make extra income per acre in 1953 is to plant Stoneville's DELFOF 9169.

*Strain 3316

Remember...

THERE'S NO SUBSTITUTE FOR GOOD SEED

No, there is no substitute for the best. In cottonseed, this means seed *direct from the breeder*. When you buy seed from Stoneville Pedigreed Seed Company, you are getting pure, scientifically-developed strains which are high in prepotency and productivity. We are originators and breeders of superior cottons.

All Stoneville's Seed have been processed through our new and exclusive FLASH PROCESS for Precision Planting.

NAME _____

ADDRESS _____

If . . .

- you want exceptionally high yields per acre
- you want a cotton with big, easy-to-pick bolls
- you want a cotton highly adapted to mechanization
- you want extra high seed milling value
- you want a cotton proven by field and variety tests
- you want a cotton which *established a world's record for per acre yield*
- you want FLASH PROCESSED seed for Precision Planting

then Delfos 9169 ('53)
is the cotton for you
in 1953
